

94390 Arrester Bank EZ-Out

The Shand & Jurs 94390 Arrester Bank EZ-Out has been designed to assist plant personnel for the inspection & removal of spiral wound Flame, Deflagration & Detonation Arrester Tube Banks. The 94390 is designed for use with arresters installed in "In-Line" process piping for the Wastewater, Oil & Gas, Chemical, Petrochemical, and Pharmaceutical Industries.

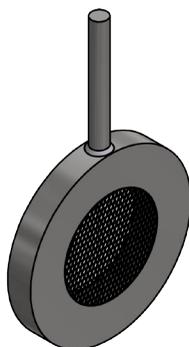

This design allows Operators & Maintenance personnel to reduce time & labor expenses when inspecting & replacing arrester tube banks that show increased pressure drop over time. The 94390 Arrester Bank EZ-Out can be utilized in piping that contains all manufacturers spiral wound arresters, making it a universal solution. Once the EZ-Out is removed, the tube bank can be easily removed without disturbing the piping.

An optional screen is available to trap particulates in the gas stream. This option may be utilized to reduce cleaning cycles.
