Click the link: <a href="#">Honeywell Versatilis Configurator Windows app</a>, a zip folder is downloaded.</li><li>2. To unzip the folder, right-click and select <b>Extract All</b>, and then follow the instructions.</li><li>3. <b>To install the certificate:</b> Open the folder and double-click <b>Versatilis.Shell.UWP_[Build Version]_x64.cer</b>, and then click <b>Install Certificate</b> (mandatory for the first-time installation). If the certificate is already installed, go to step 10.</li><li>4. On the <b>Welcome to the Certificate Import Wizard</b> dialog, select <b>Local Machine &gt; Store Location &gt; Next</b>.</li><li>5. On the <b>User Account Control</b> dialog, a message appears stating “<b>Do you want to allow this app to make changes in your device</b>”. Click <b>Yes</b>.</li><li>6. On the <b>Certificate Store</b> dialog, select <b>Place all certificates in the following store &gt; Browse</b>.</li><li>7. On the <b>Select Certificate Store</b> pop-up, select <b>Trusted Root Certificate Authorities &gt; OK</b>.</li></ol></li></ul>

8. On the **Certificate Import Wizard** page, click **Next** > **Finish** to import the certificate.
9. An **Import success** dialog appears; click **OK** and close the certificate window.  
**Note:** Users must install all dependency files or folders before launching the Honeywell Versatilis Configurator application for the first time.
10. Open the dependencies folder from the extracted zip folder, and select **x64**.

A list of APPX files is opened, install the dependency files.

11. In the extracted zip folder, select **Versatilis.Shell.UWP\_[Build Version]\_x64.appxbundle**. A pop-up appears. Select the **Launch when ready** option and click **Install**.  
After successful installation, the Honeywell Versatilis Configurator Windows app opens.

See the [Honeywell Versatilis Configurator User's Guide \(34-ST-25-70\)](#) to learn how to use the Honeywell Versatilis Configurator app.
