

## Programmable transmitter

### 5116A

- Input for RTD, TC, mV, Ohm, potentiometer, mA and V
- 2-wire supply > 16.5 V
- Bipolar voltage input
- Output for current, voltage and 2 relays
- Universal supply by AC or DC

#### Application

- Linearized, electronic temperature measurement with RTD or TC sensor.
- Conversion of linear resistance variation to a standard analog current / voltage signal, i.e. from solenoids and butterfly valves or linear movements with attached potentiometer.
- Power supply and signal isolator for 2-wire transmitters.
- Process control with 2 potential-free relay contacts which can be configured for advanced functions.
- Galvanic separation of analog signals and measurement of floating signals.

#### Technical characteristics

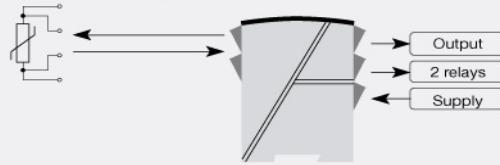

- Within a few seconds the user can program PR5116A to suit the specific application.
- By way of the front push-button the input can be calibrated to the exact span of the process. Zero drift on the process signal can be adjusted by a single press of the front button.
- A green front LED indicates normal operation and malfunction. A yellow LED is ON for each active output relay.
- Continuous check of vital stored data for safety reasons.
- 3-port 3.75 kVAC galvanic isolation.

#### Mounting / installation

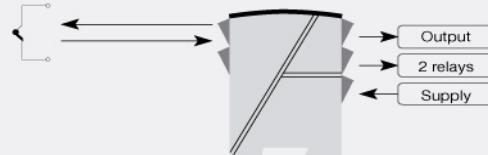

- Mounted vertically or horizontally on a DIN rail. As the devices can be mounted without any distance between neighboring units, up to 42 devices can be mounted per meter.

#### Connections

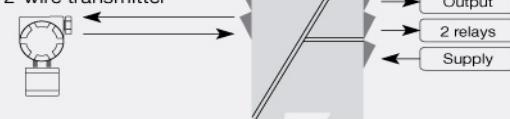

RTD and lin. resistance

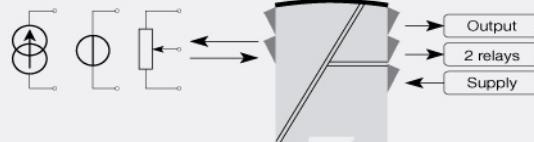

TC

2-wire transmitter

mA, VDC or potmeter

**Order:**

| Type  |
|-------|
| 5116A |

\*NB! Please remember to order CJC connectors type 5910 for TC inputs with internal CJC

**Environmental Conditions**

|                              |                      |
|------------------------------|----------------------|
| Specifications range.....    | -20°C to +60°C       |
| Calibration temperature..... | 20...28°C            |
| Relative humidity.....       | < 95% RH (non-cond.) |
| Protection degree.....       | IP20                 |

**Mechanical specifications**

|                             |                                       |
|-----------------------------|---------------------------------------|
| Dimensions (HxWxD).....     | 109 x 23.5 x 130 mm                   |
| Weight approx.....          | 225 g                                 |
| DIN rail type.....          | DIN 46277                             |
| Wire size.....              | 1 x 2.5 mm <sup>2</sup> stranded wire |
| Screw terminal torque.....  | 0.5 Nm                                |
| Vibration.....              | IEC 60068-2-6 : 2007                  |
| Vibration: 2...25 Hz.....   | ±1.6 mm                               |
| Vibration: 25...100 Hz..... | ±4 g                                  |

**Common specifications****Supply**

|                                |   |
|--------------------------------|---|
| Supply voltage, universal..... | 21.6...253 VAC, 50...60 Hz or<br>19.2...300 VDC |
|--------------------------------|---|

**Isolation voltage**

|  |                     |
|--|---------------------|
| Isolation voltage, test / working..... | 3.75 KVAC / 250 VAC |
| PELV/SELV.....                         | IEC 61140           |

**Response time**

|   |               |
|---|---------------|
| Temperature input, programmable (0...90%, 100...10%). | 400 ms...60 s |
| mA / V input (programmable).                          | 250 ms...60 s |

**Auxiliary supplies**

|   |                                     |
|---|-------------------------------------|
| 2-wire supply (pin 54...52).....                            | 28...16.5 VDC / 0...20 mA           |
| Fuse.....   | 400 mA SB / 250 VAC                 |
| Max. required power.....                                    | ≤ 3 W                               |
| Internal consumption.....                                   | ≤ 2.0 W                             |
| Programming.....  | Loop Link                           |
| Signal / noise ratio.....                                   | Min. 60 dB (0...100 kHz)            |
| Updating time.....  | 115 ms (temperature input)          |
| Updating time.....  | 75 ms (mA / V / mV input)           |
| Accuracy.....   | Better than 0.05% of selected range |
| Signal dynamics, input.....                                 | 22 bit                              |
| Signal dynamics, output.....                                | 16 bit                              |
| Auxiliary voltages: Reference voltage.....                  | 2.5 VDC ±0.5% / 15 mA               |
| EMC immunity influence.....                                 | < ±0.5% of span                     |
| Extended EMC immunity: NAMUR NE 21, A criterion, burst..... | < ±1% of span                       |

**Input specifications****Common input specifications**

|                  |                            |
|------------------|----------------------------|
| Max. offset..... | 50% of selected max. value |
|------------------|----------------------------|

**RTD input**

|  |                      |
|--|----------------------|
| RTD type.....                                    | Pt100, Ni100, lin. R |
| Cable resistance per wire (max.).                | 10 Ω (max. 50 Ω)     |
| Sensor current.....                              | Nom. 0.2 mA          |
| Effect of sensor cable resistance (3-/4-wire). . | < 0.002 Ω / Ω        |
| Sensor error detection.....                      | Yes                  |

**TC input**

|                        |  |
|------------------------|--|
| Thermocouple type..... | B, E, J, K, L, N, R, S, T, U, W3, W5, LR |
|------------------------|--|

**Cold junction compensation**

|                             |            |
|-----------------------------|------------|
| (CJC).....                  | < ±1.0°C   |
| Sensor error current.....   | Nom. 30 μA |
| Sensor error detection..... | Yes        |

**Current input**

|  |                         |
|--|-------------------------|
| Measurement range.....                   | 0...100 mA              |
| Min. measurement range (span).....       | 4 mA                    |
| Input resistance: Supplied unit.....     | Nom. 10 Ω + PTC 10 Ω    |
| Input resistance: Non-supplied unit..... | RSHUNT = ∞, VDROP < 6 V |
| Sensor error detection.....              | Loop break 4...20 mA    |

**Voltage input**

|                                    |                        |
|------------------------------------|------------------------|
| Measurement range.....             | 0...250 VDC            |
| Measurement range.....             | -2500...+2500 mV       |
| Min. measurement range (span)..... | 5 mV                   |
| Input resistance.....              | Nom. 10 MΩ (≤ 2.5 VDC) |
| Input resistance.....              | Nom. 5 MΩ (> 2.5 VDC)  |
| Input resistance.....              | > 5 MΩ (mV input)      |

|                                  |       |
|----------------------------------|-------|
| Potentiometer via 2.5 V ref..... | 170 Ω |
|----------------------------------|-------|

**Output specifications****Current output**

|                                    |                         |
|------------------------------------|-------------------------|
| Signal range.....                  | 0...20 mA               |
| Min. signal range.....             | 10 mA                   |
| Load (@ current output).....       | ≤ 600 Ω                 |
| Load stability.....                | ≤ 0.01% of span / 100 Ω |
| Current limit.....                 | ≤ 28 mA                 |
| Sensor error indication.....       | Programmable 0...23 mA  |
| NAMUR NE 43 Upscale/Downscale..... | 23 mA / 3.5 mA          |

**Relay output**

|   |   |
|---|---|
| Relay functions.....                                    | Increasing / decreasing                       |
| Relay functions.....                                    | Window  |
| Max. voltage.....                                       | 250 VRMS                                      |
| Max. current.....                                       | 2 AAC   |
| Max. AC power.....                                      | 500 VA  |
| Max. load at 24 VDC.....                                | 1 A   |
| Sensor error reaction.....                              | Break / Make / Hold / None                    |
| 2-wire 4...20 mA output: Signal range.....              | 4...20 mA                                     |
| Load stability, 4...20 mA output.....                   | ≤ 0.01% of span / 100 Ω                       |
| Max. external 2-wire supply.....                        | 29 VDC  |
| Effect of external 2-wire supply voltage variation..... | < 0.005% of span / V                          |
| *of span.....   | = of the currently selected measurement range |
